## Federal Rule of Civil Procedure 45 (c), (d), (e), and (g) (Effective 12/1/13)

### (c) Place of Compliance.

**(1) For a Trial, Hearing, or Deposition.** A subpoena may command a person to attend a trial, hearing, or deposition only as follows:

- (A) within 100 miles of where the person resides, is employed, or regularly transacts business in person; or
- (B) within the state where the person resides, is employed, or regularly transacts business in person, if the person
  - (i) is a party or a party's officer; or
  - (ii) is commanded to attend a trial and would not incur substantial expense.

**(2) For Other Discovery.** A subpoena may command:

- (A) production of documents, electronically stored information, or tangible things at a place within 100 miles of where the person resides, is employed, or regularly transacts business in person; and
- (B) inspection of premises at the premises to be inspected.

### (d) Protecting a Person Subject to a Subpoena; Enforcement.

**(1) Avoiding Undue Burden or Expense; Sanctions.** A party or attorney responsible for issuing and serving a subpoena must take reasonable steps to avoid imposing undue burden or expense on a person subject to the subpoena. The court for the district where compliance is required must enforce this duty and impose an appropriate sanction—which may include lost earnings and reasonable attorney's fees—on a party or attorney who fails to comply.

**(2) Command to Produce Materials or Permit Inspection.**

(A) *Appearance Not Required.* A person commanded to produce documents, electronically stored information, or tangible things, or to permit the inspection of premises, need not appear in person at the place of production or inspection unless also commanded to appear for a deposition, hearing, or trial.

(B) *Objections.* A person commanded to produce documents or tangible things or to permit inspection may serve on the party or attorney designated in the subpoena a written objection to inspecting, copying, testing, or sampling any or all of the materials or to inspecting the premises—or to producing electronically stored information in the form or forms requested. The objection must be served before the earlier of the time specified for compliance or 14 days after the subpoena is served. If an objection is made, the following rules apply:

- (i) At any time, on notice to the commanded person, the serving party may move the court for the district where compliance is required for an order compelling production or inspection.
- (ii) These acts may be required only as directed in the order, and the order must protect a person who is neither a party nor a party's officer from significant expense resulting from compliance.

**(3) Quashing or Modifying a Subpoena.**

(A) *When Required.* On timely motion, the court for the district where compliance is required must quash or modify a subpoena that:

- (i) fails to allow a reasonable time to comply;
- (ii) requires a person to comply beyond the geographical limits specified in Rule 45(c);
- (iii) requires disclosure of privileged or other protected matter, if no exception or waiver applies; or
- (iv) subjects a person to undue burden.

(B) *When Permitted.* To protect a person subject to or affected by a subpoena, the court for the district where compliance is required may, on motion, quash or modify the subpoena if it requires:

- (i) disclosing a trade secret or other confidential research, development, or commercial information; or

- (ii) disclosing an unretained expert's opinion or information that does not describe specific occurrences in dispute and results from the expert's study that was not requested by a party.

(C) *Specifying Conditions as an Alternative.* In the circumstances described in Rule 45(d)(3)(B), the court may, instead of quashing or modifying a subpoena, order appearance or production under specified conditions if the serving party:

- (i) shows a substantial need for the testimony or material that cannot be otherwise met without undue hardship; and
- (ii) ensures that the subpoenaed person will be reasonably compensated.

### (e) Duties in Responding to a Subpoena.

**(1) Producing Documents or Electronically Stored Information.** These procedures apply to producing documents or electronically stored information:

(A) *Documents.* A person responding to a subpoena to produce documents must produce them as they are kept in the ordinary course of business or must organize and label them to correspond to the categories in the demand.

(B) *Form for Producing Electronically Stored Information Not Specified.* If a subpoena does not specify a form for producing electronically stored information, the person responding must produce it in a form or forms in which it is ordinarily maintained or in a reasonably usable form or forms.

(C) *Electronically Stored Information Produced in Only One Form.* The person responding need not produce the same electronically stored information in more than one form.

(D) *Inaccessible Electronically Stored Information.* The person responding need not provide discovery of electronically stored information from sources that the person identifies as not reasonably accessible because of undue burden or cost. On motion to compel discovery or for a protective order, the person responding must show that the information is not reasonably accessible because of undue burden or cost. If that showing is made, the court may nonetheless order discovery from such sources if the requesting party shows good cause, considering the limitations of Rule 26(b)(2)(C). The court may specify conditions for the discovery.

**(2) Claiming Privilege or Protection.**

(A) *Information Withheld.* A person withholding subpoenaed information under a claim that it is privileged or subject to protection as trial-preparation material must:

- (i) expressly make the claim; and
- (ii) describe the nature of the withheld documents, communications, or tangible things in a manner that, without revealing information itself privileged or protected, will enable the parties to assess the claim.

(B) *Information Produced.* If information produced in response to a subpoena is subject to a claim of privilege or of protection as trial-preparation material, the person making the claim may notify any party that received the information of the claim and the basis for it. After being notified, a party must promptly return, sequester, or destroy the specified information and any copies it has; must not use or disclose the information until the claim is resolved; must take reasonable steps to retrieve the information if the party disclosed it before being notified; and may promptly present the information under seal to the court for the district where compliance is required for a determination of the claim. The person who produced the information must preserve the information until the claim is resolved.

**(g) Contempt.**

The court for the district where compliance is required—and also, after a motion is transferred, the issuing court—may hold in contempt a person who, having been served, fails without adequate excuse to obey the subpoena or an order related to it.

## **APPENDIX TO DOCUMENT REQUESTS REGARDING FORM OF PRODUCTION**

### A. Hard Copy Paper Documents

1. All hard copy paper documents should be produced as TIFF image files (black-and-white) and as JPEG image files (color) in electronic form. Each filename must be unique and match the Bates number of the page. The filename should not contain any blank spaces and should be zero padded (for example ABC0000001).
2. Each delivery should be accompanied by an image cross reference file that contains document breaks.
3. A delimited text file that contains available fielded data should also be included, at a minimum including Beginning Bates Number, Ending Bates Number, Custodian and Number of pages, as well as link to OCR text if any (see below). The following delimiters should be used:
  - a. Field Separator (ASCII:0020)
  - b. Quote (ASCII:0254)
  - c. Multi-Entry Delimiter (ASCII:0059)
  - d. <Return> Value in Data (ASCII:0174)
4. To the extent that documents have been run through an Optical Character Recognition (OCR) software in the course of reviewing the documents for production, full text should also be delivered for each document. Text should be delivered on a document level in an appropriately formatted text file (.txt) that is named to match the first bates number of the document.
5. A text cross reference load file should also be included with the production delivery that lists the beginning Bates number of the document and the relative path of the text file for that document on the production media.
6. The TIFF images should be produced as single-page Group IV TIFF format at 300 dpi with an Opticon image load file. The Opticon image load file should contain the BEGBATES value for each corresponding document and appropriate path or folder information to the corresponding images that comprise each document. Each TIFF or JPEG image should be individually Bates numbered. The Bates number must not obliterate, conceal, or interfere with any information on the produced document.
7. Every TIFF file in each production must be referenced in the production's corresponding load file. The total number of TIFF files referenced in a production's load file should match the number of TIFF files in the production.

B. All Electronic Documents

1. All electronic documents should be produced in such fashion as to identify the location (i.e. the network file folder, hard drive, backup-tape or other location) where the documents are stored and, where applicable, the natural person in whose possession they were found (or on whose hardware device they reside or are stored). If the storage location was a file share or work group folder, that should be specified as well.
2. Attachments, enclosures, and/or exhibits to any parent documents should also be produced and proximately linked to the respective parent documents containing the attachments, enclosures and/or exhibits.
3. For all documents originating in electronic form, documents should be produced as native format and in the order that they were stored in the ordinary course of business, i.e. emails that attach documents or spreadsheets should not be separated from each other and should be linked using the Group Identifier field above. The file name should match the bates number assigned to the file.
4. For Documents that are produced from electronic format, the full extracted text will be provided by a link in the main (.DAT) load file. The following extracted data and metadata fields shall to be provided in the load file:
  - a. Begbates
  - b. Endbates
  - c. Group Identifier<sup>1</sup>
  - d. Custodian
  - e. Other Custodian (if cross-custodian de-duplication is employed)
  - f. Path (original path for edocs, inbox path for emails)
  - g. Document Type
  - h. Confidentiality Designation
  - i. Subject (for emails)
  - j. To (for emails)
  - k. From (for emails)

---

<sup>1</sup> The Group Identifier should contain the Begbates value of an attachment's parent document. The Group Identifier for a parent document is equal to the Begbates for the parent document.

- l. Cc (for emails)
  - m. Bcc (for emails)
  - n. Received Date/Time (for emails)
  - o. Sent Date/Time (for emails)
  - p. Time Offset Value (indicate which time zone the data is set to when processed)
  - q. E-mail Has Attachments (Yes/No filed indicating if there are attachments to an e-mail)
  - r. E-mail Attachment Count (number of attachments to an e-mail)
  - s. Link to Extracted Text (body of email for email, extracted text of document for edocs and attachments)
  - t. File Author (for Attachments and Edocs)
  - u. File Name (for Attachments and Edocs)
  - v. File Create Date/Time (for Attachments and Edocs)
  - w. File Modify Date/Time (for Attachments and Edocs)
  - x. Page Count
  - y. MD5 Hash Value
  - z. Path to Native File
  - aa. Has Hidden Data: Yes or blank (Hidden data refers not only to Excel files with hidden columns, rows, spreadsheets, etc., but also PowerPoint files in which comments or other fields may be hidden)
5. Extracted full text (not OCR text) should be delivered for each electronic document. The extracted full text should be delivered on a document level according to the specifications above similar to paper documents.
  6. Social Media and Web Content. Social media and other web content shall be produced as Group IV TIFF images with associated metadata load files. The parties will further confer regarding the specific web pages and available metadata.

C. Production of Structured Data

Databases or structured data should be produced in a mutually agreeable data exchange format. To the extent a response to discovery requires production of discoverable electronic information contained in a database, the producing party will make available a data dictionary or equivalent information identifying the specific fields included in its database and what sort of information is stored in each field, so that the parties may meet and confer regarding which data elements will be extracted for production. Ultimately, production should be in an exportable electronic file (*e.g.*, Excel or CSV format).

D. Non-Substantive Files

System and program files defined on the National Institute of Standards and Technology (“NIST”) list need not be processed, reviewed or produced.

E. Color

For files not produced in their native format, if an original document contains color, the producing party may produce black and white image(s). At the request of the receiving party, the parties shall meet and confer regarding production of color image(s) for specific documents.

F. Bates Numbering

1. Document Images. Each page of a produced Document shall have a unique page identifier (“Bates Number”) electronically “burned” onto the image at a location that does not unreasonably conceal or interfere with any information from the source document. Any confidentiality legend shall be “burned” onto each document’s image at a location that does not unreasonably obscure any information from the source document. Redacted documents will be so identified by electronically “burning” the legend “Redacted” onto each document’s image at a location that does not unreasonably obscure any information from the source document.
2. Native Format Documents. Documents produced in Native Format will be produced with a placeholder TIFF image. Each TIFF placeholder will contain the Bates number and confidentiality designation, if any.
3. Confidentiality Designations. Information designated as “CONFIDENTIAL INFORMATION” pursuant to the terms of a Protective Order entered by the Court in the Litigation, or that has been redacted in accordance with applicable law or court order, shall show the confidentiality designation both on the face of all TIFFs pertaining to such item/document, and in the appropriate data field in the load file.

When any “CONFIDENTIAL INFORMATION” is converted to a printed or imaged format for use in any submission or proceeding, the printout or page image shall bear the protective legend on each page in a clear and conspicuous manner, but not so as to obscure the content.

G. Production Media

Documents shall be produced by SFTP site or on CD-ROM, DVD, external hard drive (with standard PC compatible interface), or such other readily accessible computer or electronic media as the parties may hereafter agree upon (the “Production Media”). Each item of Production Media shall include: (1) its own unique name and a consistent naming convention; (2) text referencing that it was produced in the Litigation; and (3) the Bates range contained on such Production Media item.

H. Attachments

Email attachments and embedded files or links must be mapped to their parent by the Document or Production number. If attachments and embedded files are combined with their parent documents, “BeginDoc” and “EndDoc” fields listing the unique beginning and ending number for each document and “BeginAttach” and “EndAttach” fields listing the begin and end of the entire document family must be included.

I. Embedded Objects

Objects embedded in Microsoft Word and .RTF documents, which have been embedded with the “Display as Icon” feature, will be extracted as separate documents and treated like attachments to the document. Other objects embedded in documents shall be produced as native files.

J. Compressed Files

Compression file types (i.e., .CAB, .GZ, .TAR, .Z, .ZIP) shall be decompressed in a reiterative manner to ensure that a zip within a zip is decompressed into the lowest possible compression resulting in individual folders and/or files.

K. Production Problems

Documents that present imaging or format production problems shall be promptly identified and disclosed to the requesting party; the parties shall then meet and confer to attempt to resolve the problems.
