Body-Worn Camera Footage Release Delayed in June's Police-Involved In-Custody Death in the City of Baltimore

BALTIMORE, MD (July 23, 2025) – The Independent Investigations Division (IID) of the Maryland Office of the Attorney General today announced the delay in the release of the body-worn camera footage for the police-involved in-custody death involving the Baltimore Police Department that occurred Tuesday, June 24, 2025, in the city of Baltimore, Maryland.

The delay in the release of the footage is due to the technical complexity and volume of officer recordings involved. The IID needs additional time to share the footage with involved parties before public release.

Per IID protocols, “The IID will generally release body-worn and/or dashboard camera footage within 20 business days after the incident. There may be situations where more than 20 business days are necessary, including, but not limited to: investigators needing more time to complete witness interviews; technical delays caused by the need to redact information that raises privacy or safety concerns; or allowing family members or subject officers to view the video before it is released to the public. There may also be situations where the IID releases video sooner than 20 days where there is a substantial public interest in doing so. If the release of video is delayed, the IID will notify the public there’s been a delay and state the reason for the delay.”

Anyone with information about this incident, including cell phone or private surveillance video is asked to contact the IID at (410) 576–7070 or by email at IID@oag.state.md.us.
